Instructor: Scott Houser, PhD

- email: shouser@mines.edu
- Office: 328 Engineering Hall
- Office Phone: 303-384-2045

How I think about teaching and learning:

Somewhere along the line, many students have developed a definition of teaching that centers on the delivery of information. However, I think of teaching as designing opportunities for students to learn.

That says something about my view of our roles in this class. Learning is your responsibility. I can’t do the hard work of learning for you. Your job in this class is to master the tools of economics so that you’ll be able to use them in your personal and professional lives.

My job is to create rich and effective ways for you to learn the principles of economics and to provide you with opportunities to practice using the tools of economics to analyze real problems. In and around those opportunities, I will do everything I can to help each of you learn.

I’m convinced that the best learning happens when it’s done with other learners. There is an enormous amount of research that demonstrates the value of active and interactive learning (I’m happy to share if you’re interested). That’s why we’re going to use most of our time in class and recitation doing economics together.

Office hours:

Office hours are times that I am largely guaranteeing that I will be available for you to find me in my office or another announced location without needing to make an appointment. I will do my best to be available at the following times and to post an announcement on Canvas on those rare occasions when I am not able to be there.

- Tuesday: 1:00 – 1:50 PM in the CoorsTek Atrium
- Wednesday: 9:00 AM – 12:00 PM in EH 328
- Thursday: 9:30 – 10:30 AM in the Coors Trek Atrium; 1:00 – 1:50 PM in EH328
- My schedule is flexible on Mondays and Fridays. Those are good days for appointments.

I’m also happy to meet you at other times by appointment if my posted office hours conflict with your schedule. I’m available most of the week when I’m not in class so we should be able to find a time that is better for you. If you’d like to make an appointment, please email me with a few suggested times, and we’ll work out a time to meet in person, talk by phone or chat online.
**Student Learning Outcomes**

At the end of the course, students will:
1. Apply the scientific method to economic questions.
2. Apply tools of cost-benefit analysis to decisions of individuals and the society.
3. Analyze markets for goods, services, and resources using the supply and demand model.
4. Analyze government policy using the tools of economics with consideration for efficiency criteria and equity considerations.
5. Explain and evaluate measures of the level and distribution of economic well-being.
6. Explain international differences in economic well-being using the traditional economic growth model with attention to the validity of the model for different institutional contexts.
7. Evaluate the predictions of economic models using economic data.
8. Analyze the behavior of producers and consumers who have market power.

**Topics Covered – additional detail in course calendar**

1. Modeling in economics
2. Economic decision-making
3. Cost-benefit analysis
4. Markets and efficiency
5. Market failures
6. Macroeconomic measurement
7. Income distribution and poverty
8. Economic growth
9. Labor markets
10. Imperfect competition

**Course description from Bulletin:** Introduction to microeconomics and macroeconomics. This course focuses on applying the economic way of thinking and basic tools of economic analysis. Economic effects of public policies. Analysis of markets for goods, services and resources. Tools of cost-benefit analysis. Measures of overall economic activity. Determinants of economic growth. Monetary and fiscal policy.

**Prerequisites:** None.

**Class meeting days/times:**
- Section A: T, 8:00 to 9:15 AM
- Section B: T, 11:00 AM to 12:15 PM
- Section C: T, 2:00 to 3:15 PM
- Section D: R, 8:00 to 9:15 AM
- Section E: R, 11:00 AM to 12:15 PM
- Section F: R, 2:00 to 3:15 PM

**Class meeting location:** CK 130

**Canvas link:** elearning.mines.edu (you should be automatically enrolled in the Canvas course)

**Instructional activity:** 3 hours lecture 0 hours lab 3 semester hours

**Course designation:** x Common Core Distributed Science or Engineering
- Major requirement Elective Other
Special information about the hybrid course design:

This course uses a hybrid-online course design. The basic idea is that you will do a significant amount of work online to get the basics of the course content before you come to class to work on applications of economic tools and models. The online work will require an average of 2 hours per week.

The online work will replace half of the class meetings each week. That is why you have enrolled for only 75 minutes of class meetings on either Tuesday or Thursday. If you need to miss your regular section, you may attend a different class meeting with the approval of your teaching assistant (TA).

TAs will conduct recitations where you can join other students to discuss course material, applications, problems, questions, and exams. These sessions are optional. We will have recitations in on Fridays. The location and schedule will be posted on Canvas.

Required Materials

Connect Economics – all assignments are integrated with Canvas so you should follow the links on Canvas to register and to complete assignments. Registration opens on Monday, 8/19. You will have courtesy access for the first 2 weeks of class. You may purchase access for the semester directly from McGraw-Hill online or from the Mines Bookstore.

Other required supplemental information: Additional required readings and assignments will be posted on Canvas.

Grades and Grading Components

- Connect Learnsmart assignments 20%
- Connect quizzes 5%
- Online discussions 15%
- Research projects 30%
- Group citizenship 5%
- Midterm exams 10%
- Comprehensive Final Exam 15%

1. Connect Learnsmart Assignments – 20% of your course grade
   This online learning resource is where you will encounter most of the basic course content. These assignments are built on an adaptive learning system that assesses your knowledge of the course content and focuses your time and effort on the areas where you need additional study. The Learnsmart assignments on Connect is the main part of the online work that replaces ½ of the class meetings this semester. Generally, there will be 1 set of Learnsmart assignments due each week by 8:00 AM on the day your class meets. See the course calendar for the schedule of assignments and estimated time for completion. Advice from other Mines students about these assignments is included in the last section of this syllabus before the course schedule. We’ll drop approximately 10% of the total points from these assignments.

2. Connect Quizzes – 5% of your course grade
   These online quizzes will give you a chance to demonstrate your mastery of the content that was learned in the Connect Learnsmart assignments. You will have access to notes, other learning resources and other students during the quizzes. See the course calendar for specific deadlines. We’ll drop the lowest quiz score from your grade.
3. **Online discussions – 15% of your course grade**
   These activities will provide opportunities for structured discussion with a small group of your peers. Weekly discussions will be asynchronous on Canvas. Most weeks, you’ll listen to a podcast or read a news article and then discuss what you learned with other students. Roles for facilitating discussions will rotate among group members. TAs will monitor and assess discussions. A rubric will be available on Canvas.

4. **Research projects – 30% of your course grade**
   There will be 3 research projects. Two will be completed in groups, and the remaining project will be completed individually. Group research projects will allow you to work with your colleagues in recitation to answer a structured question about a market, a government policy or other real-world economic issue. You will be expected to use an economic model for analysis to explain and/or predict, and to test your analysis against data. Groups will submit project reports in the form of a memo to a defined audience (e.g., employer, government agency, interest group). Groups will receive feedback from peers and your TA. Groups will revise their analyses and reports until they are acceptable. **NOTE: Failure of the group to reach a defined level of proficiency or failure of an individual to contribute to your group’s report will result in a score of 0.** Individual projects will be similar in nature to the group projects, will largely be completed outside of class, and will be graded on a standard A-F scale. The schedule for research projects is in the course calendar, will be available on Canvas and announced in class.

5. **Group Citizenship – 5% of your course grade**
   Individual group members will provide feedback on the quality of participation, engagement and professionalism of other group members. This feedback will be aggregated over all the groups in which you participate and will inform this portion of your course grade.

6. **Midterm Exam and Comprehensive Final Exam – 25% of your course grade**
   These multiple choice exams will assess your ability to use the tools developed in the course and your mastery of the course content. The first midterm will be administered during the common exam period from 7:30 – 8:30 PM on Thursday, 10/17. The second midterm will be administered during the common exam period from 7:30 – 8:30 PM on Thursday, 11/21. The common final exam will be administered according to the CSM final exam schedule. Please check the final exam schedule for the EBGN201 common exam time when the schedule becomes available.

Your grade in this class will be based on your overall percent average, using the following guidelines:

A: 92% and greater,  
A-: 90% to less than 92%,  
B+: 88% to less than 90%,  
B: 82% to less than 88%,  
B-: 80% to less than 82%,  
C+: 78% to less than 80%,  
C: 72% to less than 78%,  
C-: 70% to less than 72%,  
D+: 68% to less than 70%,  
D: 60% to less than 68%,  
F: less than 60%.

These guidelines are subject to change, but if you score in the stated range you are guaranteed at least the corresponding grade.
Grades will be maintained and posted on Canvas throughout the semester.

Extra credit may be offered for additional learning activities related to this class. Unless otherwise detailed in this syllabus, the awarding of extra credit is at the discretion of the instructor and is not guaranteed.

**Grievance Procedure:** Anyone feeling that a dispute exists after the grading of any assignment may submit a written grievance. The grievance should identify the item in dispute and arguments supporting the student's position. Grievances must be submitted in writing within two class periods following the return of the assignment. I will return a written response within two class periods after receipt.

**Course Attendance Policy**

All students are advised to be familiar with CSM’s policy regarding the make-up of work missed due to excused absences. This policy may be found in the Bulletin and at [http://inside.mines.edu/Student-Absences](http://inside.mines.edu/Student-Absences). In short, documentation for an excused absence must be provided to the Office of the Associate Dean of Students who will then send notices of excused absence to the faculty. The method for providing this documentation is up to the Associate Dean of Students. In all cases of unexcused absences the faculty member has the right to deny the student the opportunity to make up all or part of the missed work. The Athletics Department issues excused absence notices for student athletes.

**Due dates:** The dates of online assignments, quizzes, and research projects are indicated on this syllabus. We generally do not offer extensions, unless there are extenuating circumstances. These circumstances include documented illness, family emergencies, and business/athletic/school related trips. Excused absences are required for deadline extensions or make-up assignments to be provided. Please coordinate extensions for practice assignments with your TA. If you need an extension on Connect assignments, please contact the lead TA, Sayeh, at sshojaeinia@mymail.mines.edu before you open the assignments.

**Class sessions:** Although attendance is not taken on a daily basis, students are expected to regularly attend and participate in class. If you miss a class meeting, it is your responsibility to get any notes and assignments from that class. The exercises we do during classes are designed as interactive learning activities; therefore, their value depends on your presence and your participation. In-class exercises and activities cannot be exactly duplicated as individual assignments. However, alternatives for any graded assignments will be provided for students with excused absences.

**Coursework Return Policy**

Coursework will be returned within one week. Group projects will be assessed in Canvas. You are responsible for reviewing all feedback on the projects. Online assignments give you immediate feedback. Exams will be graded within one week and will be available for review with your TA.

**iClicker Policy**

We’ll use iClickers often in class; however, points will not be awarded solely based on student use of iClickers. No registration is necessary.

**Optional reading assignments**

Some students have indicated that they would like to supplement the videos and other online resources with a standard textbook. We have secured access to a very good economics principles textbook by
Expectations of online etiquette or netiquette:
Here are few do's and don'ts about communicating in your course through emails or in online discussion forums.

- **Do...**
  - Ask questions and engage in conversations as often as possible—feel free to contact the instructor via the discussion forum for questions or via email or other communication.
  - Be patient and respectful of others and their ideas and opinions they post online.
  - Remember to be thoughtful and use professional language. Keep in mind that things often come across differently in written text, so review your writing before posting.
  - Be prepared for some delays in response time, as "virtual" communication tends to be slower than "face-to-face" communication.
  - Contact the instructor if you feel that inappropriate content or behavior has occurred as part of the course.
  - Check the syllabus and course policies stated by your instructor to know what to expect about your instructor's turnaround time for responding.

- **Do NOT...**
  - Use inappropriate language—this includes, but is not limited to, the use of curse words, swearing, or language that is derogatory.
  - Post inappropriate materials—for example, accidentally posting/showing a picture that is not appropriate for the course content.
  - Post in ALL CAPS, as this is perceived as shouting and avoid abbreviations and informal language ("I'll C U L8R").
  - Send heated messages even if you are provoked. Likewise, if you should happen to receive a heated message, do not respond to it.
  - Send an email or post to the entire class, unless you feel that everyone must read it.

Diversity and Inclusion:
At Colorado School of Mines, we understand that a diverse and inclusive learning environment inspires creativity and innovation, which are essential to the engineering process. We also know that in order to address current and emerging national and global challenges, it is important to learn with and from people who have different backgrounds, thoughts, and experiences.

Our students represent every state in the nation and more than 90 countries around the world, and we continue to make progress in the areas of diversity and inclusion by providing [Diversity and Inclusion programs and services](disabilities.mines.edu) to support these efforts.

**Disability Support Services:**
The Colorado School of Mines is committed to ensuring the full participation of all students in its programs, including students with disabilities. If you anticipate or experience any barriers to learning in this course, please feel welcome to discuss your concerns with me. Students with disabilities may also wish to contact Disability Support Services (DSS) to discuss options to removing barriers in this course, including how to register and request official accommodations. Please visit their website at [disabilities.mines.edu](disabilities.mines.edu) for contact and additional information. If you have already been approved for accommodations through DSS, please meet with me at your earliest convenience so we can discuss your needs in this course.
Accessibility within Canvas:

Read the Accessibility Statement from Canvas to see how the learning management system at the Colorado School of Mines is committed to providing a system that is usable by everyone. The Canvas platform was built using the most modern HTML and CSS technologies, and is committed to W3C’s Web Accessibility Initiative and Section 508 guidelines.

Discrimination, Harassment, and Title IX:

All learning opportunities at Mines, including this course, require a safe environment for everyone to be productive and able to share and learn without fear of discrimination or harassment. Mines’ core values of respect, diversity, compassion, and collaboration will be honored in this course, and the standards in this class are the same as those expected in any professional work environment. (More information can be found here.) Discrimination or harassment of any type will not be tolerated. As a participant in this course, we expect you to respect your instructor and your classmates. As your instructor, it is my responsibility to foster a learning environment that supports diversity of thoughts, perspectives and experiences, and honors your identities. To help accomplish this:

- Course rosters are provided to the instructor with the student’s legal name. I will honor your request to address you by a preferred name or gender pronoun. Please advise me of this preference early in the semester so that I may make appropriate changes to my records.
- If something is said or done in this course (by anyone, including myself) that made you or others feel uncomfortable, or if your performance in the course is being impacted by your experiences outside of the course, please report it to:
  - Me (if you are comfortable doing so)
  - Wellness Center - Counseling (https://www.mines.edu/counseling-center/)
  - Speak Up (https://www.mines.edu/speak-up/) - Anonymous Option

In this course, we will cultivate a community that supports survivors, prevents interpersonal violence, and promotes a harassment free environment. Title IX and Colorado State law protects individuals from discrimination based on sex and gender in educational programs and activities. Mines takes this obligation seriously and is committed to providing a campus community free from gender and sex-based discrimination. Discrimination, including sexual harassment, sexual violence, dating violence, domestic violence, and stalking, is prohibited and will not be tolerated within the Mines campus community. If these issues have affected you or someone you know, you can access the appropriate resources here: http://www.mines.edu/title-ix/. You can also contact the Mines Title IX Coordinator, Camille Torres, at 303.384.2124 or titleix@mines.edu for more information.

It’s on us, all of the Mines community, to engineer a culture of respect.

CARE @ Mines:
If you feel overwhelmed, anxious, depressed, distressed, mentally or physically unhealthy, or concerned about your wellbeing overall, there are resources both on- and off-campus available to you. If you need assistance, please ask for help from a trusted faculty or staff member, fellow student, or any of the resources below. As a community of care, we can help one another get through difficult times. If you need help, reach out. If you are concerned for another student, offer assistance and/or ask for help on their behalf. Students seeking resources for themselves or others should visit care.mines.edu.
Additional suggestions for referrals for support, depending on comfort level and needs include:

- CARE at Mines: [care.mines.edu](http://care.mines.edu) for various resources and options, or to submit an online “CARE report” about someone you’re concerned about, or email care@mines.edu
- CASA - [https://www.mines.edu/casa/](https://www.mines.edu/casa/) for academic advising, tutoring, academic support, and academic workshops
- Counseling Center – [https://www.mines.edu/counseling-center/](https://www.mines.edu/counseling-center/) or students may call 303-273-3377 to make an appointment. There are also online resources for students on the website. Located in the Wellness Center 2nd floor. Located at 1770 Elm St. (photo below)
- Health Center - [https://www.mines.edu/student-health/](https://www.mines.edu/student-health/) or students may call 303-273-3381 for appointment. Located in Wellness Center 1st floor.
- Colorado Crisis Services - For crisis support 24 hrs/7 days, either by phone, text, or in person, Colorado Crisis Services is a great confidential resource, available to anyone. [http://coloradocrisisservices.org](http://coloradocrisisservices.org), 1-844-493-8255, or text “TALK” to 38255. Walk-in location addresses are posted on the website.

All of these options are available for free for students. The Counseling Center, Health Center, and Colorado Crisis Services are confidential resources. The Counseling Center will also make referrals to off-campus counselors, if preferred.

In an emergency, you should call 911, and they will dispatch a Mines or Golden PD officer to assist.

**Policy on Academic Integrity/Misconduct:**
The Colorado School of Mines affirms the principle that all individuals associated with the Mines academic community have a responsibility for establishing, maintaining an fostering an understanding and appreciation for academic integrity. In broad terms, this implies protecting the environment of mutual trust within which scholarly exchange occurs, supporting the ability of the faculty to fairly and effectively evaluate every student’s academic achievements, and giving credence to the university’s educational mission, its scholarly objectives and the substance of the degrees it awards. The protection of academic integrity requires there to be clear and consistent standards, as well as confrontation and sanctions when individuals violate those standards. The Colorado School of Mines desires an environment free of any and all forms of academic misconduct and expects students to act with integrity at all times.

Academic misconduct is the intentional act of fraud, in which an individual seeks to claim credit for the work and efforts of another without authorization, or uses unauthorized materials or fabricated information in any academic exercise. Student Academic Misconduct arises when a student violates the principle of academic integrity. Such behavior erodes mutual trust, distorts the fair evaluation of academic achievements, violates the ethical code of behavior upon which education and scholarship rest, and undermines the credibility of the university. Because of the serious institutional and individual ramifications, student misconduct arising from violations of academic integrity is not tolerated at Mines. If a student is found to have engaged in such misconduct sanctions such as change of a grade, loss of institutional privileges, or academic suspension or dismissal may be imposed.

The complete policy can be found in the [Mines’ Policy Library](http://mines.edu/policies).
Advice from previous students about the Connect Master assignments:

1. Focus on learning
   - You need to actually want to learn the material and not just get through assignments. You may get through assignments easier, but if you learn the material you'll do well on tests.
   - Sit down and do the Connect assignments with intent of learning and you will learn the material for the course very well.
   - Make sure you do the assignments ahead of time and don't just breeze through them to get the answers right. It doesn't take much extra time to be engaged when doing the activities and it is hugely beneficial.
   - Don't just mindlessly work your way through Connect activities. It is definitely possible to complete entire Connect activities by just guessing until you get enough questions accidentally right to pass the assignment. Some of my friends did this, and they ended up struggling a lot with the quizzes later on, creating huge issues. Definitely don't skim the Connect activities.

2. Watch the videos carefully
   - Always watch the videos. They are the most helpful tool. Most of the questions the system asks come from the videos. Additionally, there are definitions to key words on the side of each video.
   - Actually pay attention to the videos. It is very easy to ignore them and still get the homework done quickly, but in order to actually learn econ you should definitely watch the vids.

3. Take notes (this was the most often repeated advice)
   - Handwritten notes will make the actual assignments online go very quickly and will help in class during lectures and in-class assignments. Makes it very easy to study for exams, as well.
   - Takes detailed notes that coincide with next lecture so you can complete the in-class exercises with ease. Come to class prepared.
   - It was helpful to write down definitions and formulas into my notebook that were explained in Connect.
   - Take notes on the videos and the other resources because in the beginning I did not do that and it was very difficult to do the LearnSmart assignments and participate in class.

4. Break up the work and don’t wait until the last minute
   - Spread out the Connect assignments throughout the week. This helped my understanding as well.
   - I'd say to do it at your own pace. The site makes it very easy to break up into sections and do like a module a day which is a lot less stressful than three or four modules in one night.
   - Don't put the assignments off until the last moment. Just because you know you can get 100% on the assignments doesn't mean you should just sail through them. It'll come back to bite you on the exam.
   - I would say to NEVER wait to do all of your Connect assignments in one day/night. Mostly because it's simply not possible, and you won't learn anything.

5. Experiment
   - Don't necessarily follow one line of thought. Some chapters you'll need to read the book, others you can understand the terms and concepts easier by just doing the questions online. Some chapters you'll complete all the questions in one 30 min session. Other chapters it will take you several sessions of 30 min each to fully understand the concepts thrown at you. People learn different things at different
paces, be flexible and adjustable in your learning. Only an idiot refuses to change bad habits.

6. Trust the system
   - I would just say to trust the system and also break up the time in learning the blocks of information because it isn't useful to get it all in one go.

7. Be honest about your confidence
   - Be honest about your confidence level when answering questions. If you answer wrong and say you think it is right or you know it the system will slow you down significantly. The Connect system does help you with topics that you might be struggling with.
   - Gauge your confidence answer (I know it; I think so; etc.) based on how long it took you to think of an answer.

8. Use the resources (including ebook, Why This Matters, Worked Examples, Recharge, Reports)
   - When you get a question wrong look at at least one of the resources they provide you so you understand why you missed the question so you can learn from it and you can answer it correctly the next time.
   - Don't be afraid to get questions wrong, and use the resources Connect offers when you do! Read the real world examples [“Why This Matters”], they're actually really interesting.
   - Take advantage of recharge. You can also create your own quizzes and exams in order to be prepared for the exams.

9. Be patient
   - Stick with it. It takes some getting used to, understanding the words they want and all, but once you do it is a very useful tool to learn econ.
   - The system isn't perfect so if you think that it should give you the point and it didn't, it's fine just move on it won't affect your score.

10. Work in groups and ask questions
    - Work in groups if you are struggling with understanding material because studying together can help you comprehend material easier.
    - Try to learn the answers or concepts online, but make sure to ask questions in class of online to better understand the class and objectives.
    - Take advantage of all of its resources and if you don't feel it helped you, speak up. Go to office hours or seek more help.
**Detailed course schedule:** (NOTE: Course content and schedule are subject to change. All changes will be announced in class and on Canvas. It is your responsibility to keep up with posted announcements and changes to the schedule.)
